Detailed Action

1.) Claims 121-127 are objected to. In the first line of claim 121, "A system control at least one" does not make sense. This is apparently a typographical error. For the purpose of this Office action, it will be assumed that the aforementioned claim language reads A system for controlling at least one . Applicant is to correct this error in his response to this Office action. Claims 122-127 are objected to because they depend from objected to claim 121.

2.) The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3.) Claims 96-127 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-61 of U.S. Patent No. 6,552,303 and over claims 1-40 of U.S. Patent No. 6,710,299. Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims are broader in scope than the patented claims and are therefore obvious over the patented claims. Applicant is reminded that if he files a terminal disclaimer to overcome this rejection, he must disclaim BOTH of the above-mentioned patents.

4.) Claims 128-131 are allowable over the prior art of record. None of the prior art of record teaches or suggests a method of controlling an electric arc welder with the steps claimed, particularly the step of loading digital data including a value for a weld condition, additionally inputting a desired level for that weld condition, and comparing the value and desired level as set forth in claim 128.
